

I'm Harriot

Harriet came to Walden's Puddle as a nestling Barred Owl with juvenile cataracts (a medical condition that results in blurred vision). She was adopted by NWCC in May and was named after the abolitionist and naturalist, Harriet Tubman. As a Barred Owl, **she is naturally curious, and loves bathing in water and playing with toys.**

Barred Owl Facts

#1

The Great Horned Owl is the most serious predatory threat to the Barred Owl

#2

Young Barred Owls can climb trees by grasping the bark with their bill and talons.

#3

The oldest recorded Barred Owl was at least 24 years, 1 month old.

#4

They are easiest to find when it is night time.

#5

Most Barred Owls remain in a single area their whole lives.

#6

Barred Owls eat many kinds of small animals, including squirrels, mice, and rabbits.
